

Brian Kyle L. Salor

Software Developer

Taguig City, Philippines | Phone: +63 970 540 6985 | Email: briankylesalor02@gmail.com | Portfolio: brian-k05.github.io/Portfolio | GitHub: github.com/Brian-K05 | LinkedIn: linkedin.com/in/brian-kyle-salor-786999359

PROFESSIONAL SUMMARY

Software developer who ships web systems and APIs from requirements through a live deploy. During a 486-hour internship at Machica Firm, designed and implemented a production Insurance Data Management and Business Process Automation System (Node.js, REST APIs, Supabase) that is still used in daily operations, and provided desktop, printer, software, and network support. Freelance and public work includes a live Laravel booking and payment system, SlotBook (a public Laravel calendar with a live demo and GitHub), DeskFlow (a public Node.js request desk with a live demo and GitHub), and a public Python/Flask document tool. BSIT, Leyte Normal University, 2022–2026.

TECHNICAL SKILLS

Used on shipped work: Laravel, PHP, Node.js, Express, SQLite, JavaScript, Python, Flask, REST APIs, MySQL, Supabase, Git / GitHub. **Automation:** Business process automation, email and SMS, document generation. **IT Technical Support:** Windows 10/11, desktop support, network troubleshooting, printer support. **Also used:** React, Angular, Flutter, React Native, Kotlin.

WORK EXPERIENCE

IT Intern (Software Development and Technical Support)

Machica Firm, Inc. | February 2026 — May 2026

- Designed and implemented an Insurance Data Management and Business Process Automation System that leadership approved and deployed. Still used in daily operations.
- Built REST APIs, authentication, database architecture, and automation with Node.js and Supabase — Gmail SMTP, Semaphore SMS, Excel reporting, and document generation.
- Helped deploy, test, and debug production systems over a 486-hour internship.
- Supported desktops, printers, software, and networks; installed and configured Windows and business software.

Freelance Software Developer

Self-Employed | 2024 — Present

- Shipped a live Laravel booking and payment system for an editing business (AWS Lightsail) — still online.
- Built DeskFlow, a public staff/client request desk (Node.js, Express, SQLite) — live demo and GitHub.
- Built SlotBook, a public booking calendar (Laravel, MySQL) — live demo and GitHub.
- Built a Python/Flask barcode-to-Word service (public repository).
- Take freelance work from requirements through testing and maintenance.

SELECTED PROJECTS

Editing Service Platform

Live client system — Laravel 10, PHP, MySQL, AWS Lightsail

- Booking, document intake, GCash payment recording, and an admin dashboard for a professional editing business. Repository is private at the client's request.

DeskFlow

Public demo — Node.js, Express, SQLite · deskflow-w1n5.onrender.com · github.com/Brian-K05/Deskflow

- Staff/client request desk: shops file concerns, staff work the queue, each client sees only their own rows. Dummy data. Live demo and public repository.

SlotBook

Public demo — Laravel, PHP, MySQL · slotbook-production.up.railway.app · github.com/Brian-K05/SlotBook

- Booking calendar: guests pick a day and an open hour; admin confirms, cancels, or marks paid. Dummy data. Live demo and public repository.

Insurance Data Management and Business Process Automation System

Production system — Machica Firm, Inc.

- Designed and implemented APIs, authentication, automation, reporting, document generation, and a secure client portal. No public URL; still in daily use.

A4 Word Barcode Generator

Public repository — Python, Flask, python-docx

- Flask service that generates a Code 128 barcode and places it in a print-ready A4 Word document.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Leyte Normal University

2022 — 2026

CERTIFICATIONS AND ACHIEVEMENTS

Internship Completion Certificate — Machica Firm, Inc. (486 Hours)

Competence in Practicum Award

Computer Systems Servicing NC II (TESDA)

Hosted webinar — Scalable Applications with Hexagonal Architecture (November 19, 2025)

Organized and hosted a session with a Senior Software Engineer from Jetstar Airways.

ASEAN AI Hackathon 2026 — Certificate of Participation

Passage to ASEAN and ASEAN AI Council. Team participant.
