PROFESSIONAL SUMMARY

Junior Software Developer and Backend Developer seeking a full-time junior role. BSIT from Leyte Normal University (June 2026). 0 years of professional employment. Completed a 486-hour internship at Machica Firm, Inc., leading feature design and development of a production insurance workflow system (MAXIN) with one co-intern; three staff members were using it at the end of the internship. Strongest areas are Node.js APIs, Laravel, and Python, with public demos that include live deployments and automated tests.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python
Backend: Laravel, Node.js, Express, Flask, REST APIs
Frontend: Blade, HTML, CSS
Databases: MySQL, SQLite
Backend Services: Supabase, Edge Functions
Automation & Integration: Gmail SMTP, Semaphore SMS, Excel reporting, python-docx
Tools: Git, GitHub

WORK EXPERIENCE

IT Intern (Software Development and Technical Support)

Machica Firm, Inc. | February 2026 - May 2026

- Led feature design and development of a production insurance workflow system with one co-intern using Node.js, REST APIs, authentication, and Supabase; leadership approved deployment, and three staff members were using the system at the end of the internship.
- Built most of the backend: REST APIs, authentication, the Supabase data model, a data-management module with CRUD for insurance records, and Edge Functions. Also contributed to the frontend.
- Implemented email, SMS, and spreadsheet automations (Gmail SMTP, Semaphore SMS, Excel reporting, and document generation) so operational updates no longer depended on fully manual office steps.
- Deployed, tested, and maintained the live system over 486 hours. Office desktop and printer support when needed.

SELECTED PROJECTS

SlotBook

Laravel, PHP, MySQL | slotbook-production.up.railway.app | github.com/Brian-K05/SlotBook

- Engineered a booking workflow that enforces unique time slots and an administrator path to confirm, cancel, or mark paid as a status flag only; covered the rules with feature tests and deployed a public demo.

DeskFlow

Node.js, Express, SQLite | deskflow-w1n5.onrender.com | github.com/Brian-K05/Deskflow

- Built a request-desk API with row-level visibility so staff see every ticket while each client sees only their own records; added a status workflow, staff CSV export, visibility tests, and a public demo.

PaperOut

Python, Flask, python-docx | web-production-97c62.up.railway.app | github.com/Brian-K05/PaperOut

- Automated a document pipeline that validates CSV headers, generates a ZIP of Word certificates and an A4 first-row proof, and ships as a public demo (sample names only; not a live credential).

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Leyte Normal University | 2022 - June 2026

CERTIFICATIONS

- Computer Systems Servicing NC II (TESDA)
- Internship Completion Certificate - Machica Firm, Inc. | 486 hours

AWARDS & ACTIVITIES

- Competence in Practicum Award
