Brian Kyle L. Salor

Virtual Assistant | Admin Support | Junior Web & Mobile Developer

Taguig City, Philippines | +63 970 540 6985 | briankylesalor02@gmail.com

Portfolio: https://brian-k05.github.io/Portfolio | LinkedIn: linkedin.com/in/briankylesalor | GitHub: github.com/Brian-K05

PROFESSIONAL SUMMARY

Admin VA for inbox, calendar, documents, follow-ups, and spreadsheets — and freelance full-stack developer for paid clients. Comfortable written English for email and chat. Based in Taguig; Philippine hours with US overlap. Sole developer on paid builds: disaster-response web/mobile, a school learning platform, and an on-device ASL-to-text Android app. BSIT (June 2026). Open to admin VA or junior web/mobile work.

SKILLS

Admin: Inbox, calendar, documents, follow-ups, data entry, spreadsheets, simple SOPs

Tools: Google Workspace, Microsoft Office, Canva, Slack, Zoom

Build: React, React Native/Expo, JavaScript, Python, Node.js, Laravel, Flask, Supabase, REST APIs, MySQL/SQLite, Android TFLite, Git/GitHub

Support: Desktop and printer support (TESDA CSS NC II)

WORK EXPERIENCE

Freelance Full-Stack Developer — Sign2Text (Paid)

Sole developer | April 2026 – Present

- Built Android ASL A–Z → text end to end: camera, on-device MediaPipe + MLP/TFLite model, and letter UI.
- Owned dataset tooling, model export, and mobile integration as sole full-stack developer.

Freelance Full-Stack Developer — Towards Safety / Emergency Response (Paid)

Sole developer | February 2026 – October 2026

- Built React web + Expo mobile disaster-response system (Supabase auth, roles, realtime incidents) for Northern Samar municipalities.
- Shipped resident reporting, official workflows, GPS reports, notifications, handover docs, and Android release support.

Freelance Full-Stack Developer — CSJS Learning Platform (Paid)

Colegio de San Juan Samar · Sole developer | April 2026 – July 2026

- Built Grade 7–10 learning web app (React, Vite, Supabase): auth, lessons, quizzes, rankings, and teacher video admin.

IT Intern — Software Development & Technical Support

Machica Firm, Inc. | February 2026 – May 2026 | 486 hours

- Co-built production insurance workflow (Node.js, Supabase); email/SMS/spreadsheet automations; desktop/printer support. Three staff using it at internship end.

PUBLIC DEMOS

SlotBook (Laravel) — booking calendar · slotbook-production.up.railway.app

DeskFlow (Node.js) — staff/client request desk · deskflow-w1n5.onrender.com

PaperOut (Python) — CSV → Word certificates · web-production-97c62.up.railway.app

Portfolio: brian-k05.github.io/Portfolio
