SUMMARY

Information Technology graduate with hands-on experience in software development, IT technical support, and AI-powered solutions. During a 486-hour professional internship, contributed to the development and deployment of a production Insurance Data Management & Business Process Automation System while providing desktop, printer, software, and network troubleshooting to support daily business operations. Skilled in backend development using Node.js, REST APIs, Supabase, and database design, with knowledge of Active Directory, DNS, DHCP, Cisco networking fundamentals, and Windows environments. Experienced in developing AI-powered applications using Retrieval-Augmented Generation (RAG) and LLM integration. A fast learner with strong analytical, problem-solving, and collaboration skills committed to delivering reliable technical solutions.

EXPERIENCE

IT Intern (Software Development & Technical Support)

February 2026 – May 2026

Machica Firm, Inc.

- Provided IT technical support by troubleshooting desktop computers, printers, software applications, and network connectivity issues to maintain daily business operations.
- Assisted users in resolving technical issues while ensuring minimal downtime and efficient system performance.
- Installed, configured, and maintained Windows-based systems and business software for end users.
- Participated in deployment, testing, debugging, and post-deployment validation of business systems.
- Identified workflow inefficiencies and proposed an Insurance Data Management & Business Process Automation System that was approved and deployed by company leadership.
- Developed REST APIs, authentication, database architecture, and automation workflows using Node.js and Supabase.
- Implemented secure authentication, automated account creation, Gmail SMTP notifications, Semaphore SMS integration, Excel reporting, and document generation.

Freelance Software Developer

2024 – Present

Self-Employed

- Designed and developed custom software solutions, business websites, management systems, and workflow automation applications for students and small businesses.
- Built responsive full-stack web applications with secure authentication, REST APIs, and database integration.
- Developed AI-powered applications using Retrieval-Augmented Generation (RAG) and multiple LLMs to automate business workflows and customer support.
- Developed mobile applications using React Native and Kotlin based on project requirements.
- Collaborated directly with clients to gather requirements, recommend technical solutions, and deliver customized software applications.
- Performed testing, debugging, optimization, and maintenance to improve software quality and user experience.

ASEAN AI Hackathon 2026

June 2026

- Collaborated with a multidisciplinary team to develop an AI-powered solution addressing real-world challenges while representing Leyte Normal University at the ASEAN AI Hackathon 2026.

PROJECTS

Insurance Data Management & Business Process Automation System

Production System – Machica Firm, Inc.

- Proposed and led the development of a production insurance management system.
- Developed backend APIs, authentication, automation workflows, reporting, and secure client portal features.
- Successfully deployed and maintained a production system that continues to improve operational efficiency and streamline daily company operations.

AI-Powered Customer Support Assistant (RAG)

- Developed an AI assistant using Retrieval-Augmented Generation (RAG) to deliver context-aware customer support.
- Integrated multiple large language models (LLMs) with vector search to improve response relevance and business knowledge retrieval.

TECHNICAL SKILLS

Software Engineering: Full-Stack Development, Backend Development, Node.js, REST APIs, Database Design

Artificial Intelligence: Retrieval-Augmented Generation (RAG), LLM Integration, AI Chatbots

Automation: Business Process Automation, Email & SMS Automation, Document Generation

IT Technical Support: Hardware & Software Troubleshooting, Network Troubleshooting, Printer Support, Windows 10/11, Desktop Support, End-User Technical Support, Software Installation & Configuration

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

Leyte Normal University

CERTIFICATIONS & ACHIEVEMENTS

- ASEAN AI Hackathon 2026 – Certificate of Participation (Passage to ASEAN & ASEAN AI Council)
- Competence in Practicum Award
- Internship Completion Certificate – Machica Firm, Inc. (486 Hours)
- Computer Systems Servicing NC II (TESDA)
